

Monitoring data from 6
landscapes is entered into
the programme's online
Result Management System
(RMS) every reporting period

The data from the RMS feeds
a real time dashboard that
allows tracking progress at
different levels: thematic
area, country, project, etc

The dashboard helps to:

- * Track programme's progress,
- * Analyse the information to create qualitative tools,
- * Disseminate results,
- * Ongoingly report against the programme's logframe.
